ACCREDITATION

Pima Heart & Vascular's Ambulatory Surgery Center is accredited by the Accreditation Association for Ambulatory Health Care.

AAAHC accreditation means that Pima Heart and Vascular participates in on-going self evaluation, peer review and education to continuously improve its care and services. We also commit to a thorough, on-site survey by AAAHC surveyors, who are themselves health care professionals, at least every three years.

The ASC is a State licensed, Medicare certified facility.

ABOUT US

Pima Heart and Vascular's Ambulatory Surgery Center (ASC) provides a convenient and cost-effective alternative to hospital-based outpatient procedures.

Our facility offers safe, high-quality care in a comfortable setting. With advanced technology, our experienced board-certified physicians are dedicated to providing you with unsurpassed patient care.

The ASC is much smaller than a large hospital, allowing for greater ease of scheduling, reduced costs, and personalized attention.

We maintain ongoing assessments for quality improvement and patient outcomes.

WHAT TO EXPECT

All procedures are treated with the utmost sensitivity to a patient's desire for rest and privacy. Our staff ensures that you are fully informed about all aspects of your surgery.

We are a private facility, performing non-emergency and elective procedures, which means you can expect minimal delays and maximum personal attention. We put you, the patient, first.

For many patients, the entire stay at our center, including surgery and recovery, is under four hours. This will vary on the unique circumstances for each patient.

Every one of our operating suites is equipped with advanced technology and the skilled support of our clinical and anesthesia team. We also offer pre-operative patient care and post-anesthesia care.

PROCEDURES

We provide the highest quality cardiovascular outpatient procedures to the patients of Southern Arizona including:

- Cardiac Catheterization
- Pacemakers
- Implantable Loop Recorders
- Defibrillator
- Cardiac Resynchronization Therapy (CRT)
- Implantable Ports
- Fistula
