

Meet with your  
physician from  
the comfort and  
safety of home.

## NOW OFFERING TELEHEALTH

### We are committed to your health.

We understand that during these uncertain times, many people are not addressing other important health concerns as they choose to stay home. It is vital for people with cardiovascular health problems to continue to see their doctor.

Pima Heart and Vascular now offers Telehealth services, so you can meet with your provider from the comfort and safety of home. Telehealth or telemedicine is a virtual visit with your medical provider that you do using your smartphone, tablet or computer. If you have this and a reliable wireless internet connection, you can have a telemedicine appointment! Some appointments may not qualify for telehealth as they require a physical examination or in-person testing.

To learn more about telehealth appointments, call us at (520) 838-3540 or visit [pimaheart.com/telehealth](http://pimaheart.com/telehealth)

Use a device with a camera such as a smartphone, tablet or computer.

We will provide a secure link to your doctor's virtual waiting room.

Your doctor will join in by video when they are ready to begin your visit!
